additional methods to perform additional queries. Also we are going to protect the CRUD type Rest Api with Sanctum, using SPA and token authentication. Chapter 14: We are going to consume the Rest Api through a CRUD application in Vue 3 using axios requests and web components with Oruga UI; we will also see the process of uploading files. Also we will protect the application in Vue with login required to access its different modules using SPA authentication or Laravel Sanctum tokens. Chapter 15: We are going to learn how to manage the cache, to save access data to improve application performance and avoid bottlenecks with the database. Chapter 16: We are going to learn how to manage access policies to certain application modules through Gates and Policies. Chapter 17: We will see how to handle polymorphism relationships to reuse models that have the same behavior. Chapter 18: We will see how to manage the permissions and roles of a user to authorize certain parts of the application with a flexible scheme and widely used in web applications of all kinds using Spatie, in this chapter we will learn how to perform this integration and we will develop a module to manage this permissions.
